

engineered

Fractional Engineering Management Services

Fractional CTO, fractional VP of Engineering, fractional Director of Hardware – whatever the title engineered LLC can provide leadership to bring your project from concept, to detailed design, to launch, and through the regulatory process into full scale production. Specializing in **Medical Device**, we can plan and execute on your rapid development needs leveraging our principal's 25+ years of experience in multiple industry verticals.

Product Design as a Services

Our team has helped many established companies and startups quickly get their products to market by providing engineered solutions to their product design challenges.

We have a database of dependable subcontractors and suppliers around the US and the world ready for all volumes of prototyping and production of your product. As experts in rapid prototyping technologies, we have in-house 3D printing and bring the latest best practices and techniques to bear on your product.

We provide our customers with a full-service solution and can be your whole engineering department or fill gaps in your established team.

Portfolio Examples

Organ Transport System

- Design of Experiments
- Pugh decision matrix
- CE mark certification
- IEC 60601 and 10993
- Low volume, in-house manufacturing

POC Tester

- IEC 13485
- Industrial Design
- Full Service
- High Volume, off-shore and on-shore manufacturing

Robotic Positioning Arm

- Design History File
- FEA
- Managed team
- Project Scheduling
- Human Factors
- CRD, PRD authoring
